## MORETON SHOW – SATURDAY 7<sup>th</sup> SEPTEMBER 2024 FIRE RISK ASSESMENT

In order to comply with relevant fire safety legislation you MUST complete a Fire Risk Assessment of your unit/stand in line with nationally recognised fire risk assessment guides.

The Risk Assessment needs to identify the fire hazards and persons at risk, you must endeavour to remove or reduce these risks and protect people from fire. Failure to comply with this requirement may result in your unit/stand being prohibited from use.

You must be able to answer YES to the following questions. This signed and completed form must submitted to the event organiser as well as be maintained available for inspection by the Fire & Rescue Service / Event Organiser upon request.

You must undertake a Fire Risk Assessment for each structure, which must be suitable for the circumstances. You do not need to use this form and may use another method if you wish, however, this form is considered to be suitable for most standard temporary structures.

Show	Moretor	n Show 2024	4		
Type & use of unit					
Size (m2)					
Maximum capacity	Staff		Public	Total	

Question	Yes/No	Additional actions / Comment
Are adequate exits provided for the numbers of persons within the unit or stall? (Are your staff and customers able to evacuate easily if the normal exit is blocked?)		
Where necessary, are there sufficient directional signs indicating the appropriate escape route and do they comply with current regulations?		
Are the exits maintained available, unobstructed, and unlocked at all times the premises are in use/		
If the normal lighting failed would the occupants be able to make a safe exit? (Consider back up lighting)		
Do you have an adequate number of appropriate fire extinguishers/fire blankets available in prominent positions and easily available for use?		
Has the fire-fighting equipment been inspected within the last 12 months? Note: a certificate of compliance will normally be required		
Have your staff been instructed on how to operate the fire-fighting equipment provided?		
Have your staff been made aware of what to do should an incident occur, how to raise the alarm, evacuate the unit, and the exit locations?		

Have you identified combustible	
materials that could promote fire	
spread beyond the point of ignition	
such as paper/cardboard, bottled	
LPG etc. and reduced the risk of	
them being involved in an incident?	
Have you identified all ignition	
sources and ensured that they are	
kept away from all flammable	
materials?	
materials	
Are the structure, roofing, walls	
and fittings of your stall or unit	
flame retardant?	
Note: certificates of compliance	
will normally be required	
If any staff sleep in the stall is	
there a working smoke detector	
and a clear exit route at night?	
Note : Persons should not be	
allowed to sleep within a high	
risk area and some Authorities	
and events do NOT allow any	
-	
sleeping within units.	
Are you aware that you must	
not stock or sell certain items,	
i.e. fireworks, garden flares,	
household candles, tea lights,	
etc.?	
Do you have sufficient bins for	
refuse? Is all refuse kept away	
from your unit?	
nom your unit.	
Are you aware that petrol

Do you ensure that all gas supplies are isolated at the cylinder, as well as the appliance when the apparatus is not in use?		
Do you ensure that only those cylinders in use are kept at your unit/stall? (Spares should be kept to a minimum and in line with any specific conditions for the event)		
Is a member of staff, appropriately trained in the safe use of LPG, present in the unit / stall at all times?		
If you answered any questions 'N separate sheet if necessary)	o'; please de	etail below actions taken to remedy the situation: (continue on
